BIRD EXPERT
FOUAD ITANI
BIRDS OF LEBANON

This is an invitation to honor and value the presence of nature, birds and trees in the streets of Beirut .

Walk around Jeanne d'Arc Street, follow the map and discover its distinct character, with heritage architecture, and large specimen trees scattered around, creating various opportunities for life on the street.

Take time to notice the tags, read the stories, history, origins, and benefits of Beirut's majestic trees.

Appreciate the shade of trees, listen to the sound of birds, read about the ecosystems, & discover the stories of people appropriating spaces around them.

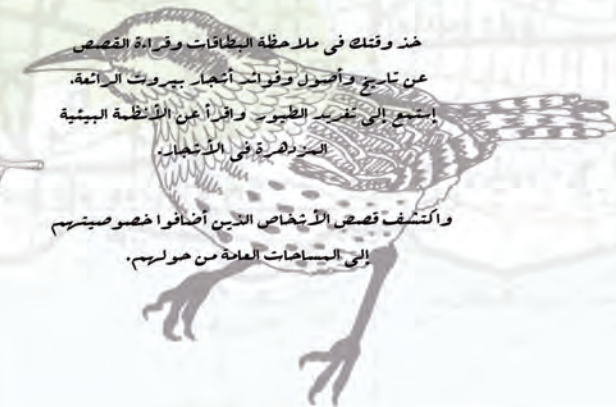

Hoping that this intervention will be a step in the right direction to foster future trees & birds ecosystems in Beirut.
